

House Crack Monitoring Kit

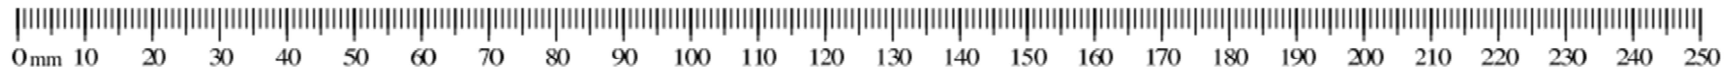

Use this crack monitoring kit to record the length and width of cracks in your house.

- Print the next page on to A4 paper with no scaling
- Tear off or cut out individual measuring strips
- Fill in room name and crack location
- Stick measuring strip to wall/ceiling along crack or across crack using double sided tape
- Mark length of crack onto measuring strip
- Take a photo of crack and measuring strip
- Keep the photos to show to your Cornell Engineers representative

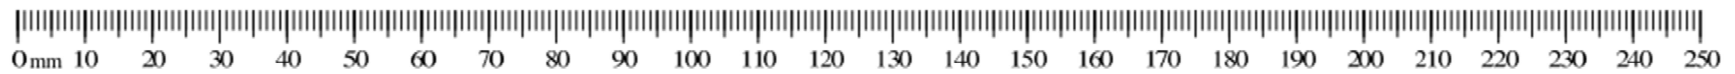

For more information on ideas for crack monitoring, see our website.

Here's an example:

		
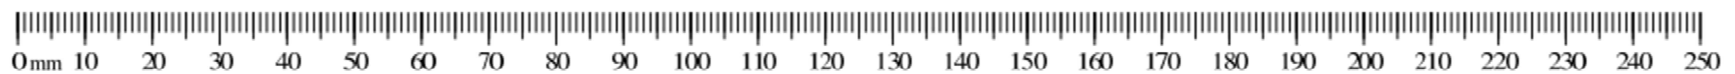

Room Name <i>Abbey's Room</i>	Crack Location <i>Under side window</i>	Date <i>20 November 2015</i>

Room Name	Crack Location	Date

Room Name	Crack Location	Date

Room Name	Crack Location	Date
